

George Koufie

Jacksonville, NC | 9199025779 | gkoufie224@gmail.com | [LinkedIn](#) | [GitHub](#) | [YouTube](#)

PROFESSIONAL SUMMARY:

Cloud Infrastructure Engineer with 3 years of professional IT/systems administration experience, including hands-on project work designing, building, and automating AWS cloud infrastructure. AWS Certified Solutions Architect – Associate and Microsoft Certified Azure Administrator, with a B.S. in Cloud Computing and additional certifications in cloud, security, networking, and Linux. Experienced with Terraform, Python, GitHub Actions, Docker, Kubernetes, Linux, IAM, cloud networking, monitoring, and security automation. Built reproducible AWS infrastructure, CI/CD pipelines, event-driven automation, and security tooling while applying systematic root-cause analysis to complex infrastructure issues. Brings a security-first, automation-driven approach with experience communicating technical issues and solutions across technical and non-technical teams.

TECHNICAL SKILLS:

Cloud Platforms: AWS — VPC, EC2, S3, Lambda, API Gateway, DynamoDB,

EventBridge, IAM, Transit Gateway, Site-to-Site VPN, ECS Fargate, Aurora, EKS, CloudWatch, CloudTrail, Systems Manager

Infrastructure as Code: Terraform (modular design, remote state, CI-driven plan/apply)

CI/CD & Containers: GitHub Actions, Jenkins, Docker, Kubernetes, SonarQube, Trivy, Semgrep

Networking & Security: Hub-and-spoke VPC architecture, Site-to-Site

VPN/IPsec, Security Groups, NACLs, IAM least-privilege policy design, OIDC federation

Linux & Scripting: Linux system administration (iptables, systemd, journalctl, tcpdump), Bash, Python

AI-Augmented Development: Claude Code (agentic infrastructure deployment and troubleshooting), prompt engineering for automation and documentation

Operating Systems: Windows, Linux

Languages: English, Twi, Fanti, Ga (native)

CERTIFICATIONS

AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner, Microsoft Certified: Azure Administrator Associate (AZ-104), Microsoft Certified: Azure Fundamentals (AZ-900), CompTIA Cloud+, CompTIA Security+, CompTIA Network+, CompTIA A+, CompTIA Project+, LPI Linux Essentials

AI & PROFESSIONAL DEVELOPMENT

Anthropic — AI Fluency: Framework & Foundations, Anthropic — Claude 101

EDUCATION

Per Scholas | AWS re/Start Training | *Jacksonville, NC*

November 2026

- This rigorous, full-time, 15-week virtual re/Start Training program provides an understanding of Cloud Computing Services, Networking, Databases, and AWS Cloud Management, Monitoring, and Governance Services.
- Attended weekly professional development to develop a personal brand, create a strong technical resume, practice professional communication and collaborative skills, and develop skills required to succeed in a technical environment.
- Course Focus: Linux, Python, Auto Scaling, EC2, Lambda, Shell Scripting, Cloud Concepts, Network Firewall, AWS System Manager, Redshift, and DynamoDB.

Western Governors Univ. | B.S. Cloud Computing | Salt Lake City, UT

May 2025

James Sprunt Comm. Col. | A.S. Information Technology | Kenansville, NC

May 2023

Technology Support Specialist | Onslow County Gov. | Jacksonville, NC Feb.2026 -July 2026

IT Technician

Sept. 2024 -Feb 2026

- Independently triaged, diagnosed, and resolved Tier I/II technical incidents across Windows endpoints, Microsoft 365, identity services, networking, and business applications, applying root-cause analysis to resolve complex issues and reduce repeat incidents.
- Administered identity and access management through Active Directory and Microsoft Entra ID, including user provisioning, access permissions, and least-privilege controls to support secure and standardized access management.
- Collaborated with cross-functional IT teams to troubleshoot and resolve infrastructure and application issues, documenting technical findings and resolution steps to improve knowledge sharing and operational consistency.
- Maintained technical documentation, deployment procedures, and asset records to support standardized operations, infrastructure maintenance, and reliable service delivery.

IT Operations Specialist | CarolinaEast Health System | New Bern, NC Aug 2023 - Sept 2024

- Diagnosed and resolved hardware, software, networking, and endpoint issues across a healthcare environment, restoring services through systematic root-cause analysis and troubleshooting.
- Administered identity and access management using Active Directory and Microsoft Entra ID, provisioning user accounts, enforcing MFA, and managing permissions in accordance with least-privilege principles.
- Deployed and maintained enterprise software, operating systems, and endpoint configurations using Microsoft SCCM, supporting standardized, secure, and reliable workstation deployments.

- Configured and supported Cisco VoIP infrastructure, including TFTP services, troubleshooting connectivity and service issues to maintain reliable communications across clinical and administrative departments.

Personal Projects

Hybrid Cloud Network Architecture | Terraform, AWS Transit Gateway, Site-to-Site VPN, GitHub Actions

- Designed and deployed a multi-VPC hybrid network (Terraform, Transit Gateway hub-and-spoke, Site-to-Site VPN/IPsec) validated through repeatable Terraform destroy/reapply cycles from a clean environment, demonstrating fully reproducible infrastructure.
- Diagnosed a GitHub Actions OIDC authentication failure invisible to config comparison (two byte-identical IAM trust policies behaving differently) by reading CloudTrail's raw AssumeRoleWithWebIdentity denial event, restored CI/CD deployment without weakening the trust policy's security.
- [GitHub Repo](#)

Serverless Link Shortener API | AWS Lambda, API Gateway, DynamoDB

- Designed and built a production-style serverless REST API using Lambda, API Gateway, and DynamoDB, demonstrating event-driven architecture, stateless compute, and infrastructure automation.
- [GitHub Repo](#)

DevSecOps CI/CD Pipeline | GitHub Actions, Docker, Trivy, Semgrep, Kubernetes

- Built a GitHub Actions CI/CD pipeline integrating automated SAST (Semgrep), container vulnerability scanning (Trivy), and deployment quality gates that prevented critical vulnerabilities from reaching Kubernetes.
- [GitHub Repo](#)

AWS Security Baseline Audit Tool | Python, boto3

- Built a Python CLI using boto3 to identify AWS security misconfigurations across IAM, S3, EC2, CloudTrail, and RDS, producing JSON, HTML, and terminal reports through modular, testable code.
- [GitHub Repo](#)

AI-Augmented Cloud Development | Claude Code

- Used Claude Code as an AI engineering assistant to accelerate solution design, implementation, debugging, documentation, and infrastructure troubleshooting across multiple AWS projects while validating all generated code before deployment.
- [GitHub Repo](#)

Enterprise AWS Landing Zone (NovaRetail) | Terraform, GitHub Actions, Python

- Designed a secure multi-account AWS Landing Zone (Terraform: VPC, IAM, security, logging, budget modules) replacing ad hoc developer-provisioned resources that caused inconsistent networking and audit-visibility gaps.
- Backed the design with architecture decision records, a documented threat

model, and Python-based compliance audit tooling (IAM, S3 public-access, security-group checks) with unit test coverage.

- [GitHub Repo](#)

Event-Driven Security Guardrail | AWS EventBridge, Lambda, CloudTrail, DynamoDB, IAM, Terraform

- Built an event-driven security automation pipeline using EventBridge, Lambda, and CloudTrail to detect and automatically remediate security group and S3 misconfigurations, with IAM policies enforcing resource-level remediation boundaries.
- Diagnosed a silent event-delivery failure caused by a missing CloudTrail trail and restored the pipeline by provisioning the required trail through Terraform.
- Validated remediation and security controls through live testing, confirming automatic remediation of in-scope resources and IAM-enforced denial of out-of-scope resources, with actions logged to DynamoDB for auditability.

PROFESSIONAL DEVELOPMENT

- Per Scholas AWS re/Start Program (2026)
- AWS Community Builder – Networking & Content Delivery (2026)
- Ongoing study in Platform Engineering, Software Engineering, AI-assisted Development, and Cloud Architecture
- Npower Cloud Computing Program (Feb 2027)
- Ongoing study for AZ400
