

George Koufie

Jacksonville, NC | gkoufie224@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY:

Cloud & DevOps Engineer with 4+ years of IT operations experience and hands-on experience building AWS and Azure infrastructure using Terraform, Kubernetes, Docker, CI/CD automation, and Python. Experienced in enterprise troubleshooting, cloud networking, IAM, infrastructure automation, monitoring, and security. AWS Certified Solutions Architect-Associate and Microsoft Certified: Azure Administrator Associate (AZ-104), with a B.S. in Cloud Computing. Proven ability to troubleshoot complex technical issues, automate repeatable processes, and build secure, reliable cloud solutions.

EDUCATION:

Per Scholas | AWS re/Start Training | Jacksonville, NC

November 20

This rigorous, full-time, 15-week virtual re/Start Training program provides an understanding of Cloud Computing Services, Networking, Databases, and AWS Cloud Management, Monitoring, and Governance Services. Attended weekly professional development to develop a personal brand, create a strong technical resume, practice professional communication and collaborative skills, and develop skills required to succeed in a technical environment. Course Focus: Linux, Python, Auto Scaling, EC2, Lambda, Shell Scripting, Cloud Concepts, Network Firewall, AWS System Manager, Redshift, and DynamoDB.

Western Governors Univ. | Bachelor of Science in Cloud Computing | Salt Lake City, UT

May 2025

James Sprunt Comm. Col. | Associate of Science in Information Technology | Kenansville, NC

May 2023

CERTIFICATIONS:

AWS Certified Cloud Practitioner

Jan 2024

AWS Certified Solutions Architect - Associate

July 2025

Microsoft Certified: Azure Fundamentals

July 2024

Microsoft Certified: Azure Administrator Associate

July 2025

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, Lambda, VPC, IAM, S3, EKS, RDS, DynamoDB, CloudWatch, CloudTrail); Microsoft Azure (Azure Site Recovery, Azure SQL Database failover groups, Recovery Services vault, RTO/RPO measurement, Azure CLI, Virtual Machines, Virtual Network, Entra ID, Storage Accounts, Azure SQL, Cosmos DB, Azure Monitor)

DevOps & Infrastructure as Code: Terraform, GitHub Actions, Jenkins, Azure DevOps, AWS CodePipeline, AWS CloudFormation, Azure Bicep, ARM Templates

Containers & Kubernetes: Docker, Kubernetes, Amazon EKS, Azure Kubernetes Service (AKS), Helm, Argo CD, GitOps

Monitoring & Observability: Amazon CloudWatch, Azure Monitor, Prometheus, Grafana

Scripting & Configuration: Python, Bash, PowerShell, YAML

Version Control: Git, GitHub

Networking & Security: TCP/IP, DNS, VPC/VNet, Subnets, Routing, Security Groups, NACLs, VPN/IPsec, Transit Gateway, IAM, RBAC, MFA, OIDC, Least Privilege

Operating Systems: Linux, Windows, Windows Server

PROFESSIONAL EXPERIENCE

Onslow County Government | Jacksonville, NC

Cloud Support Engineer

Feb 2026 - July 2026

Technology Support Specialist

Sept 2024 - Feb 2026

- Designed and deployed cloud infrastructure across AWS and Azure using Terraform, implementing Infrastructure as Code (IaC) for repeatable and version-controlled resource provisioning.
- Built CI/CD pipelines with GitHub Actions to automate infrastructure validation, testing, security checks, and deployment workflows.

- Developed serverless automation using AWS Lambda, Azure Functions, EventBridge, and Event Grid to automate cloud operational tasks and improve resource utilization.
- Built and containerized applications using Docker, stored container images in cloud registries, and deployed workloads to Kubernetes/EKS environments

CarolinaEast Health System | New Bern, NC

IT Operations Specialist |

Aug 2023-Sept 2024

- Independently resolved 90%+ of 40–50 weekly Tier I/II incidents across Windows, Microsoft 365, identity services, networking, hardware, software, and business applications in an enterprise environment supporting 1,000+ users across county departments.
- Managed 30+ identity and access requests weekly across Active Directory, Microsoft Entra ID, and Microsoft 365, including user provisioning, group membership, permissions, account changes, deactivation, and authentication support.
- Troubleshoot Active Directory permissions and file-share access issues, identifying problems involving user accounts, group membership, permissions, authentication, and network connectivity.
- Performed root-cause troubleshooting across endpoint, software, network, authentication, and access-related incidents, resolving issues within scope and escalating complex infrastructure problems with documented diagnostic findings.

CLOUD ENGINEERING PROJECTS

Azure Disaster Recovery Drills | Azure Site Recovery, Azure SQL failover groups, Terraform, Azure CLI Sep 2026

- Built two cross-region DR labs (West US to Central US) with Terraform, and ran real failovers against RTO/RPO targets committed to Git before each run: an Azure Site Recovery VM failover, and an Azure SQL failover group under a live write load.
- ASR failover: measured RTO of 2m34s against a 15-minute target (met) and RPO of 304 s against a 5-minute target (missed by 4 s). Documented the miss with a hypothesis for the cause.
- SQL failover group: forced failover at about 10 writes/sec measured RTO of 12.9 s against a 60 s target (met) and 21 rows lost (about 2.3 s) against a 5 s target (met). A planned failover lost 0 rows.
- Diagnosed ASR errors on unsupported disk controller, kernel and agent versions, and on disabling replication with the source VM stopped. Tore both labs down and verified against Azure directly, keeping spend under \$1 with a budget alert. [GitHub Repo](#)

Enterprise API Onboarding Platform | Azure API Management, Terraform, GitHub Actions

January 2026

- Architected a multi-tenant Azure API Management platform using layered Terraform state (shared platform vs. per-API onboarding) so that onboarding a new API is structurally incapable of modifying core gateway/VNet/Key Vault infrastructure — enforced by a custom least-privilege Azure role plus an automated CI guard rail that fails any plan touching shared resources. [GitHub Repo](#)

EKS Platform & Reliability Engineering Lab | AWS EKS, Fargate, Terraform, Terragrunt, Kubernetes | Sept 2026

- Built and deployed a Fargate-only Amazon EKS platform using reusable Terraform modules and Terragrunt, provisioning multi-AZ VPC networking, private application subnets, EKS Fargate profiles, and automatically bootstrapped remote state. [GitHub Repo](#)

Hybrid Cloud Network Architecture | Terraform, AWS Transit Gateway, Site-to-Site VPN

June 2026

- Architected a 3-VPC hybrid AWS network via Transit Gateway hub-and-spoke routing and a Site-to-Site VPN/IPsec tunnel, validated through repeated destroy/apply cycles from a clean state to prove reproducibility. [GitHub Repo](#)
